## EXPLORING THE DOLOMITES

---

This unique travel/study-field seminar features a wide-ranging exploration of the Dolomites, recently designated as World Heritage Site by the UNESCO for the distinctive variety of their morphology, geology and landscape.

# HIGHLIGHTS

These spectacular and monumental mountains retain traces of extraordinary interest for disciplines such as Geology, Paleogeography, Geomorphology and Paleontology. As the theater of some of the most extreme battles of WWI, they preserve a vivid and painful memory of the Great War that changed forever world history and altered the borders of many countries including Italy and Austria.

## Requirements and Homework Policy

- Mandatory pre-departure Introduction to the Field seminar in July (6 online meetings including guest lectures by international scholars)
- Conscious and respectful participation to the various activities: 30%
- 2 Reading Report to be decided with the teacher (4 pages): 20%
- Daily reflective Journal: 25%
- Final Project: 25% Students may choose one of the following: 1) an extension of the journal; 2) a curated photo blog; 3) a Story Map Digital Project; 4) one 10 pages paper to be discussed with the instructor.

The assignments are due two weeks after the end of the seminar on September 24.

### GEOLOGICAL AND BOTANICAL TRAILS

The botanical path Dos Capèl - Gardonè presents an extraordinary blossom of rhododendron, wood anemones, stone-breaks, gentians, green alders and juniper bushes. Latemar's rocks and fossils in the Geological Trail from Passo Feudo tell the tale of a tropical sea and large volcanoes in the area that is now the Dolomites.

*Botanical Trail, Latemar*

*Geological Trail, Latemar*

### ARCHEOLOGICAL AND PALEONTOLOGICAL TRAILS AND MUSEUMS:

Hiking the Bletterbach gorge means undertaking a journey through millions of years and go hunting for animal and plant fossils that disappeared forever. The permanent exhibition at the South Tyrol Museum of Archaeology in Bolzano, Italy includes Ötzi the Iceman: a mummy from the Copper Age, 5300 years old.

### TRENCHES, TUNNELS, AND OPEN AIR MUSEUMS OF WW1

The Lagazuoi tunnels constitute a complex, a total of 11 tunnels excavated during World War I in an area that was on the Austrian-Italian border. We will also visit the Open air Museum of the 5 Torri - Passo Falzarego and attend seminars at the UNIBZ.
